MGC3_README.txt -- Brief description of bundle contents -- 21 June, 2017.

The **data** collection contains the file 'Mars_Cave_Catalog.tab' which is the ASCII data table without headers or delimiters.

The **miscellaneous** collection contains the file 'Mars_Cave_Catalog_shapefile.csv' which is an alternate form of the catalog readable by JMARS GIS software (Free download at jmars.asu.edu). This file contains all of the catalog data and additional formatting and header information for JMARS. Although other GIS formats, such as ESRI, are not provided here (being non-compliant with PDS4 archiving standards), from JMARS the catalog can be saved to ESRI and variety of other GIS formats.

The **document** collection contains the PDF document 'mars_cave_catalog_archive_description.pdf' which provides a detailed description of the MGC3 project and associated data.

The **xml_schema** collection contains the relevant PDS4 XML Schema and Schematron files.
